PREFACE.

Mr. Isaac F. Wood is one of the earliest collectors in America, his long and enthusiastic interest in Numismatics dating back to the sixties. For several years he devoted his attention to the publishing and designing of various medals relating to the historical and political history of America, and to his efforts are due many of the medals relating to events celebrated from 1868 to 1880.

The coins and medals of General George Washington have been his especial study, and the success which has crowned his efforts may be judged from a perusal of the pages describing this section. Many of the greatest rarities are to be found in the catalogue, and we would call attention of advanced collectors to these gems.

This is Mr. Wood's entire collection, and with the exception of two lots, which are designated, all are to be sold without limit or reserve. To the advanced amateur the dispersion of such a large collection is a delight, for it affords him an opportunity to acquire many coins and medals for which he has long sought in vain, as it is becoming more and more difficult to procure rarities.

We hope collectors will accord this sale the same generous support they have given our sales in the past. We guarantee all coins and medals genuine and as described; holding this guarantee good indefinitely.

Bids will be faithfully executed by the other regular dealers and ourselves; and collectors will oblige every one concerned, and often save loss, by sending their orders in so they will be received a few days before sale—it allows of their being notified if mistakes have been made, which have been singularly frequent recently.

After the sale, Catalogues priced in ink may be had for sixty cents, in advance.

The profile has been scraped many years ago, and a pin scratch extends down the back of the head; the edge has some dents and two nicks where some one has tried the metal. Poor, but almost as fine as Mr. Appleton's illustrated in Crosby, Plate x 2. This piece is unique in this metal, but two others are known, neither of which can be obtained, one being in the collection of the Mint, Philadelphia, the other in the collection of Mr. W. S. Appleton, Boston, to whom we submitted this piece for his judgment as to its genuineness, and he replied he believed it to be "very probably genuine." It is not a cast from either the two specimens known, as it shows differences in the impression. We have given it careful inspection and believe it to be genuine and a struck piece and sell it with our guarantee. It was purchased for \$19 at the sale of the Petry Collection, May 10, 1893, lot 304.

Bronze. Two have the loop on edge removed. "Spring"
and "Winter" very good, former nicked. "Summer"
very fine. Excessively rare. 30½. 3 pcs.

NOTE.—We believe these medals were made for presentation to
Indians, and the scenes depicted were intended to educate
them to the advantages of civilization. That they were
so used seems more than likely, judging from the fact that
they generally bear evidences of wear, and the ring
attached to the edge so it could be suspended around the
neck of the recipient.
